

Providing End-to-End Technology Solutions Enhancing  
Construction Safety, Efficiency and Productivity

### Workers & Material Tracking

- Geofencing
- Workers Safety Using SOS Button
- Access Control & Density Policy Enforcement
- Proximity Alert, Occupancy Heat Maps & Contact Tracing
- Heavy Construction Machinery & Material Tracking

### Wireless IoT Sensors

- Concrete Monitoring (Temperature, Humidity & Strength)
- Collision Avoidance
- Predictive Maintenance
- Smart Lockout Tagout Padlock
- Leak Detection & More...

SMART BADGE

#### Sleek, Smart and Multi-Functional.

The smart badge is a portable multi-mode tracker in ID card format with embedded sensors, ideal for tracking, zone notification and monitoring of worker safety and site security.

CONCRETE MONITORING

#### Wireless Condition Monitoring of Concrete During Casting and Drying.

A wireless IoT network sensor that monitors concrete conditions during casting and drying. The product's web service includes reporting and alarm functions. The sensor works without a SIM card, separate power supply or battery.

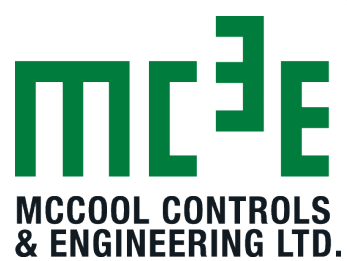

PREDICTIVE MAINTENANCE

#### Artificial Intelligence for Predictive Maintenance

An IoT device that alerts you in real-time on the operating status of your machines. Prevent failures and reduce downtime with the power of artificial intelligence and connected objects.
